

Wheat Grower Corn Moisture Averaging Program

Effective November 28th, 2011 Wheat Growers will average moisture for new Corn until further notice.

Shrink will be applied load by load. Averaging of moistures (for Drying Charges), will be offered on loads that are 18.0% or less. No moisture discounts will be taken on corn averaging 14.5% or less (15.0% at West Terminal and Huron).

Corn whose moisture level is 18.1% or greater will continue to be settled on a load by load basis.

This program may be limited by facility space constraints, please contact your Wheat Grower location for details.

Subject to change at any time without notice
